INVOICE DATA EXTRACTION TASK

ENVIRONMENT:

- Web browser (Firefox) with internet access
- Text editor (gedit) with example CSV file

OBJECTIVE: Extract and compile invoice data into a structured CSV format.

MULTI-PAGE DATA EXTRACTION PLAN

PHASE 1 - PAGE 1 PROCESSING: Fetch and parse initial data

INPUT DATA (from web interface):

- Invoice ID (unique identifier)
- Due Date (DD-MM-YYYY format)

EXTRACTION STEPS:

1. Click invoice download button
2. Open the downloaded invoice file
3. Extract the following fields: • Invoice ID • Invoice Date • Company Name • Total Amount
4. Enter data into CSV file (one line per record)

PHASE 2 - PAGE NAVIGATION: After initial data is extracted

1. Navigate to page 2 of the invoice list
2. Repeat the same extraction process
3. Continue adding data to the CSV file
